

ABDELRAHMAN ASHRAF EL-SAYED

Full Stack Developer · Cybersecurity Enthusiast · CS Student @ ECU

☎ 01028934048 | ✉ abdelrahmanashraf.dev@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Computer Science student at Egyptian Chinese University (Expected 2028) with hands-on internship experience at BEDO Company building React.js UIs. Passionate about Cybersecurity — completed Network Fundamentals training and built security-focused projects. Expanding full-stack skills through DEPI, with a strong foundation in OOP, problem-solving, and real-world application development.

EDUCATION

Bachelor of Computer Science | Egyptian Chinese University (ECU), Cairo | *Expected 2028*

EXPERIENCE

Frontend Developer Intern — React.js | BEDO Company

- ▶ Developed responsive UI components using React.js, HTML, CSS, and JavaScript to improve usability and maintain consistent design across the application.
- ▶ Refactored and improved reusable React components, simplifying frontend structure and improving maintainability.
- ▶ Collaborated with developers to understand project architecture and translate UI requirements into working features.
- ▶ Participated in debugging and testing processes to ensure stable and user-friendly interfaces.

COURSES & TRAINING

- ▶ Full Stack Web Development (Ongoing) — DEPI
- ▶ Network Fundamentals — Beginner Cybersecurity Track
- ▶ Frontend Web Development — HTML, CSS, JavaScript
- ▶ C++ Programming & Object-Oriented Programming
- ▶ Python Programming Basics
- ▶ Databases and SQL Fundamentals

PROJECTS

◆ CYBERSECURITY

Password Strength Checker — *Python · Cybersecurity*

- ▶ Analyzes password strength based on length, character variety, and common pattern detection.
- ▶ Provides real-time feedback guiding users toward creating more secure passwords.
- ▶ Demonstrates input validation and security policy enforcement concepts.

Authorization Dashboard — *React.js · RBAC · Web Security*

- ▶ Simulates role-based access control with protected routes and conditional UI rendering.
- ▶ Implements authentication state management and permission-based rendering.
- ▶ Demonstrates understanding of authorization flows and security-first frontend design.

🌐 **Live:** auth-dashboard-sigma.vercel.app

📁 **Code:** github.com/G1H6-bit/auth-dashboard

◆ REACT.JS PROJECTS

Grade Calculator — *React.js · Vite · JavaScript*

- ▶ Full React.js GPA calculator with semester tracking, animated donut ring, grade quick-select buttons, live search, and academic standing detection (Dean's List, Honors, etc.).

- Built with Vite for fast builds, deployed live on Vercel.

 **Live:** grade-calculator-react-ztpx.vercel.app  **Code:** github.com/G1H6-bit/grade-calculator-react

E-Commerce Product Interface — *React.js · JavaScript*

- Product listing with filtering and category selection using reusable React components and dynamic rendering.

Movie Explorer Web App — *React.js · REST API*

- Fetches live movie data from external API with search functionality and responsive design.

Personal Portfolio Website — *React.js · HTML · CSS*

- Responsive portfolio showcasing projects with modern UI, reusable components, and clean layout.

◆ WEB PROJECTS (HTML · CSS · JavaScript)

XO Game — Tic Tac Toe — *HTML · CSS · JavaScript*

- Browser-based game with custom win-detection algorithm, score tracking, dark/light mode, and smooth animations.

Registration Form — *HTML · CSS · JavaScript*

- 3-step wizard form with real-time validation, password strength meter, and animated success screen.

Grade Calculator (HTML/JS) — *HTML · CSS · JavaScript*

- Original grade calculator with real-time computation and responsive layout.

◆ OTHER PROJECTS

OOP Applications — *C++*

- Console applications applying classes, inheritance, and encapsulation with modular, maintainable code.

SQL Database Projects — *SQL*

- Student Database System and Product Inventory Database using SELECT, INSERT, UPDATE, DELETE queries.

SKILLS

Web & Languages	HTML5 · CSS3 · JavaScript · Python · C++ · C#
Frameworks	React.js · Vite · Node.js (learning) · Express (learning)
Cybersecurity	Network Fundamentals · Password Security · RBAC · Auth Flows · Access Control
Database	SQL · MongoDB (learning) · Database Design
Tools & Concepts	Git · GitHub · Vercel · REST APIs · OOP · Responsive Design · DSA
Soft Skills	Analytical Thinking · Teamwork · Communication · Time Management · Attention to Detail
Languages	Arabic (Native) · English (Good)
