Career Objective:

Computer Science student at Egyptian Chinese University with hands-on experience building web interfaces using React.js, HTML, CSS, and JavaScript. Completed a frontend development internship where I improved reusable UI components and collaborated with a development team to implement responsive user interfaces—strong foundation in object-oriented programming (C++, C#) and problem-solving. Currently expanding full-stack skills through the Digital Egypt Pioneers Initiative (DEPI) and actively building projects that demonstrate real-world frontend development practices.

Education

Bachelor of Computer Science, Egyptian Chinese University (ECU), Cairo

Expected Graduation: 2028

Experience

Frontend Developer Intern – React.js

BEDO Company

- Developed responsive UI components using **React.js, HTML, CSS, and JavaScript** to improve usability and maintain consistent design across the application.
- Refactored and improved **reusable React components**, helping simplify frontend structure and improve maintainability.
- Collaborated with developers to understand project architecture and translate UI requirements into working features.
- Participated in debugging and testing processes to ensure stable and user-friendly interfaces.

Courses

- Full Stack Web Development (Ongoing) – Digital Egypt Pioneers Initiative (DEPI)
- Frontend Web Development – HTML, CSS, JavaScript
- C++ Programming and Object-Oriented Programming
- Python Programming Basics
- databases and SQL fundamentals

Skills

Technical Skills

- HTML5, CSS3, JavaScript
- React.js
- SQL & Database Fundamentals
- C# Programming
- C++ Programming
- Python Programming
- Web Development Fundamentals
- Object-Oriented Programming (OOP) Concepts
- Problem Solving & Debugging
- Version Control Basics (Git)

Soft Skills

- Analytical Thinking & Logical Reasoning
- Problem-Solving Skills
- Effective Communication
- Teamwork & Collaboration
- Time Management
- Adaptability
- Attention to Detail

Language Skills

- Arabic: Native
- English: Good

Projects

HTML, CSS, JavaScript

- Built responsive web pages with interactive elements such as navigation menus and dynamic UI behavior.
- Implemented structured layouts and reusable styles to maintain a consistent design across pages.
- Focused on improving **user experience, responsiveness, and clean code structure.**

Object-Oriented Programming Applications

C++

- Developed multiple console applications applying **core OOP concepts, including classes, inheritance, and encapsulation.**
- Designed modular program structures to improve code organization and maintainability.
- Practiced debugging and logical problem-solving through structured programming tasks

React.js

Developed interactive web applications using **React.js, JavaScript, HTML, and CSS**, focusing on reusable components, state management, and responsive design.

- **E-Commerce Product Interface**
Built a product listing interface with filtering and category selection. Implemented reusable React components and dynamic rendering of product data to improve user experience.
- **Movie Explorer Web App**
Created a React application that fetches movie data from an external API and displays detailed information about movies. Implemented search functionality and responsive UI design.
- **Personal Portfolio Website**
Designed and developed a responsive portfolio website to showcase projects and technical skills, focusing on clean layout, reusable components, and modern UI practices.

SQL Database

Worked with basic SQL queries to understand database structure, data retrieval, and simple data manipulation.

- **Student Database System**
Designed simple tables to store student information and used SQL queries such as `SELECT`, `INSERT`, `UPDATE`, and `DELETE` to manage records.
- **Product Inventory Database**
Created a basic database to track products, prices, and quantities. Practiced writing queries to retrieve product information and perform simple data updates.
