SUMMARY UI/UX designer focused on crafting simple, polished, and user-friendly digital journeys. Experienced in translating research and requirements into clear wireframes and responsive, high-fidelity prototypes using Figma. Passionate about reducing friction in multi-step flows such as onboarding, applications, and sign-up journeys.

SKILLS Figma, Wireframing, Responsive Design, Prototyping, User Flows, User Research, Usability Testing, Design Systems, Interaction Design, HTML, CSS, Accessibility (WCAG basics)

EXPERIENCE UI/UX Designer — Clarity Digital Studio, Cairo (Apr 2025 - Present) - Designed the end-to-end candidate application journey for a hiring platform, from job search to profile creation to application submission - Built low-fidelity wireframes in Figma to map each step of the candidate flow, then refined into responsive high-fidelity prototypes for desktop and mobile - Simplified a 7-step signup flow down to 3 steps, reducing drop-off in usability testing sessions - Created and maintained a reusable Figma component library to keep the candidate and employer experiences visually consistent

UI/UX Design Intern — PixelCraft Studio, Cairo (Sep 2024 - Mar 2025) - Designed wireframes and prototypes in Figma for a mobile onboarding flow - Ran usability testing sessions with 8 participants and iterated designs based on feedback - Delivered responsive design specs ready for developer handoff

EDUCATION B.A. in Graphic Design (Digital Media Focus) — Helwan University (2020 - 2024)

PROJECTS Redesigned a recruitment website's job application flow, restructuring the layout to be fully responsive across desktop, tablet, and mobile, and simplifying form fields to improve completion rate in usability tests from 55% to 82%.
